9. Integrate with Oracle Document Cloud Service
10. Publish pages

Add Data Visualizations

11. Create a data source
12. Add the default data visualization
13. Configure data visualization

Manage Membership and Security

14. Add members
15. Create a custom role
16. Edit permissions for a role
17. Customize page permissions

Build a Portal

1

Create a portal

- > Sign in to Oracle WebCenter Portal.
- > In the portal browser, click **Create Portal**.
- > Choose a template and provide portal specifications like the portal title, description, search keywords, and type of portal.
- > Click **Create Portal**.

Create Portal @

Title

Description
Enter Description

Keywords
Orahealth
portal

URL
Orahealth

Public Private Hidden

Create pages or subpages

- 1 In the portal editor, click **Create New Page**.
- 2 Choose the page style you want to use and specify the page title and other details.
- 3 Click **Create Page**.

Build portal navigation

- Select an existing navigation item in the portal editor, then click its **Actions** icon and select **Add**.
- Select **Page link**. You can select any other navigation item you want to add.
- In the Pages dialog, select the page you want to add to portal navigation and save your changes.
- Similarly add other navigation items and specify the properties if required.

Customize portal look and feel

- In the portal editor, click the **Settings** icon.
- On the **Settings** page, modify the settings to suit your needs.
- Click **Save**.

Develop Portal Pages

Enable services

- In the portal editor, click the **Tools and Services** icon.
- Select the tools and services you want to enable in your portal, for example Documents, Events, Lists, and Discussions.
- Click **OK**.

6

Add components to a page

- Open your portal page in the portal editor.
- Click **Add Content**.
- In the resource catalog, locate the required component and add it to the page.

7

Manage portal content

- In the portal editor, open your page, and click **Add Content**.
- Select **Content Management**, then click **Content Manager**. Save the page
- In the portal view mode, click **Upload** and select **Standard Check-In** to upload a document.
- Browse to locate the file you want to upload and click **Upload**.

8

Use content presenter

- In the portal editor, click **Add Content** on the desired page.
- Select **Content Management** from the resource catalog, then click **Content Presenter**. Save the page.
- Click anywhere in the Content Presenter task flow and click **Edit**.
- Click **Select Content**, select a display template, and browse to the content you want to display on your page.

9

Integrate with Oracle Document Cloud Service

- In the portal editor, click **Add Content** on the desired page.
- Select **Content Management** from the resource catalog, then click **Oracle DOCS Content Manager**.
- In the Oracle DOCS Content Manager task flow, click the **View Actions** icon and select **Parameters**.
- In the Parameters dialog, specify the Oracle Document Cloud Service URL and select the required theme for the page. Save the page.

10

Publish pages

- In the portal editor, click the **Drafts** icon.
- Select the pages you want to publish.
- Click **Publish**.

Add Data Visualizations

11

Create a data source

- In the portal editor, click the **Assets** icon.
- In the left panel, under Data Sources, click **SQL Data Sources**, then click **Create**.
- In the Create New SQL Data Source dialog, specify the page title and configuration details. Specify the SQL statement to query the SQL data source. For example, `SELECT * FROM Persons WHERE City LIKE 'sa%'`.
- Click **Test** to validate and click **Save**.

12

Add the default data visualization

- In the portal editor, click **Add Content**.
- From the resource catalog, select **Data Presenter Visualization**.
- Save the page.

13

Configure a data visualization

- In the page editor, select the data visualization component and click **Configure**.
- On the **Data Source** page, select the existing data source and click **Next**.
- On the **Template** page, select a visualization template to present the data retrieved from the data source and click **Next**.
- On the **Options** page, set the elements on the **Setting** tab and define the parameters on the **Parameters** tab. Click **Save**.

Manage Membership and Security

14

Add members

- In the portal editor, click the **Security** icon.
- On the **Members** tab, click **Add People** or **Add Groups**.
- Search and select the members you want to add.
- Select a role and click **Add**.

15

Create a custom role

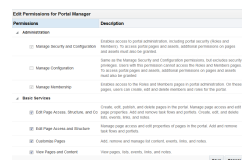

- On the **Roles** tab, click **Create Role** and select **Custom Role**.
- Provide role specifications such as, the role name, description, and role template.
- Click **OK**.

16

Edit permissions for a role

- On the **Roles** tab, select a role and click **Edit Permissions**.
- Select the permissions you want to assign to the role.
- Click **Save**.

17

Customize page permissions

- Open your portal page in the portal editor, then click its **Actions** icon and select **Page Information**.
- On the **Security** tab, select **Override Security**.
- Modify the access permissions as required.
- Click **Save**.

You're done!
