Oracle TopLink - Version 12.1.3.0.0 and later
Information in this document applies to any platform.

GOAL

How to enable JPA 2.1 in WebLogic Server 12.1.3?

Document heading "Using JPA 2.1 with Oracle TopLink in WebLogic Server " mentions that a patch can be downloaded and applied using OPatch to enable JPA 2.1. Which patch is it?

SOLUTION

When you use Oracle TopLink as the persistence provider in WebLogic Server 12.1.3, you can install Patch: 17754607 that provides support for the Java Persistence Architecture (JPA) 2.1.
If you do not apply this patch, JPA 2.0 is supported by default.

Refer to the Readme file for instructions to apply the patch with OPatch.
